

"The team you can trust"

Commercial Electric Vehicle Charging Installations

A growing amount of businesses are deciding to have electric vehicles in their fleets and are active in having Electric Vehicle Charging Points (EVCP) and there is funding available. BMM Energy Solutions (BMM) are OLEV approved supplier installers and are on the EST website as a recommended installer for UK.

BMM can offer you the full service from survey to electrical design and from install to aftercare agreements - we lead the way.

BMM provide the highest quality install as well as being affordable in our challenging economic climate, making savings can make all the difference to a business. But you know that quality is equally important. That's why we've partnered with market leaders Rolec and Schneider Electric.

Together we give you access to the latest innovations while ensuring that you receive the highest quality hardware. Whatever your circumstances, we will provide a solution to suit you.

The choice is yours...

Every business is different. Size, location, all go to determine what options are best suited to your organisation. That's why with BMM you can choose from a full selection of wall mounted and post mounted charging points with either single or double headed applications.

A seamless service to help you at every step.

Our team will work with you from initial enquiry through to final installation. We deliver a full service that includes your electrical survey, site survey and installation.

All work is fully tested and commissioned by our qualified electricians to 17th edition BS 7671 standard and in line with the IET code of practice for electrical vehicle charging equipment installation. You'll also be given a full communications package to help you get the best from your new charge point.

Excellent service from a government approved installer with experience.

It doesn't stop there though.

We know that you may need support after installation. That's why we give you a twelve month warranty as standard with the option to extend to a three years with service plan.

World leading safety by design.

The ergonomic design not only looks great but is weatherproof and specifically addresses the issue of reduced access locations. We can even work with you to provide a unit with your own company logos.

Some solutions we offer are:
